## INNOVATIVE ENGINEERING

Established in 1989 MCE is working as an international system provider for steel and machinery technology we started our successful business in the Aerospace industry in 2001. Since this time we were a reliable partner in each civil Airbus program.

Our expertise is steel construction combined with mechanical and system components, jigs and tools. Our aim is to meet the high demands of our customers and to guarantee optimal performance of the plants.

This is achieved by effective project management, by applying the thorough technical knowledge of our experienced and highly-qualified staff and by a long-term, successful cooperation with reliable partners.

Acting as partners, we provide project assistance to our customers during entire project life from draft to acceptance and even beyond that, if necessary. For example, we implement plants for exact positioning and consistent joining of extremely demanding components in the field of aviation industry.

Furthermore health, safety, environment and quality (HSEQ) plays a central role in our company. That's why we are among others certified according to:

- EN 9100
- ISO 9001
- OHSAS 18001
- ISO 14001 and EN1090-1

# AEROSPACE

## SYSTEM INTEGRATION AND LIFE CYCLE PARTNER

We combine constructive structural steel engineering with the necessary mechanical and electro-technical components and integrate them into a functional whole.

Coordination – from conceptional engineering to execution, including the integration of all plant-specific systems and components, all based on the tried-and-tested methods of project management – is our major strength.

In order to ensure sustainable customer satisfaction we will be available as your contact even after the project has been completed. As an experienced life cycle partner we also can give support for e.g. maintenance, dismantling and scrapping.

Our success is based on creative design and on the highest-quality workmanship combined with project management competence.

### Our Services:

- Project-Development
- Key-Account Management
- Turn Key Supplier
- Full Service General Contractor
- EPC-Contracting
- Project Financing
- After Sales Service
- Life-Cycle Partnership
